Dkt. No. 2271/62975

**Listing of Claims**

The following listing of claims will replace all prior versions, and listings, of claims in the subject application:

1. (previously presented) A communication terminal device provided with a function of rejecting receipt of messages from communication partners other than communication partners previously registered in receipt-allowed communication partner registration table, said communication terminal device comprising:

a receipt rejecting communication control medium collecting communication control information in connection with a communication relating to a message arrival from a communication partner not registered in said receipt-allowed communication partner registration table and storing said collected communication control information in a signal-receiving rejecting communication control information storage medium;

a communication control list creating medium creating a list of image information on the basis of said communication control information stored in said signal-receiving rejecting communication control information storage medium; and

a list outputting medium visibly outputting said list of image information created by said communication control list creating medium,

wherein when said communication relating to the message arrival from said communication partner not registered in said receipt-allowed communication partner registration table is rejected, a message receiving process is not performed by said communication terminal device for the receipt-rejected communication, and

wherein for a receipt-rejected communication partner, said list of image information shows a plurality of rejected communications from the receipt-rejected communication partner including for each rejected communication from the receipt-rejected communication partner the date and time of the rejected communication.

2. (previously presented) A method of controlling a communication terminal device provided with a function of rejecting receipt of messages from communication partners other than communication partners previously registered in a receipt-allowed communication partner registration table, said method comprising:

Koichiro MAEMURA, S.N. 09/653,994  
Page 3

Dkt. No. 2271/62975

collecting communication control information in connection with a communication relating to a message arrival, from a communication partner not registered in said receipt-allowed communication partner registration table and storing said collected communication control information in a signal-receiving rejecting communication control information storage medium;

creating a list of image information on the basis of said communication control information stored in said signal-receiving rejecting communication control information storage medium; and

visibly outputting said created list of image information,

wherein when said communication relating to the message arrival from said communication partner not registered in said receipt-allowed communication partner registration table is rejected, a message receiving process is not performed by said communication terminal device for the receipt-rejected communication, and

wherein for a receipt-rejected communication partner, said list of image information shows a plurality of rejected communications from the receipt-rejected communication partner including for each rejected communication from the receipt-rejected communication partner the date and time of the rejected communication.

3. (previously presented) A communication terminal device provided with a function of rejecting receipt of messages from communication partners other than communication partner previously registered in a receipt-allowed communication partner registration table, said communication terminal device comprising:

a normal communication control medium collecting communication control information in connection with a communication relating to receipt of a message from a communication partner registered in a transmission-allowed communication partner registration table or said receipt-allowed communication partner registration table, and storing said collected communication control information in a normal communication control information storage medium;

a receipt-rejected communication control medium collecting communication control information in connection with a communication relating to a message arrival from a communication partner not registered in said receipt-allowed communication partner registration

Koichiro MAEMURA, S.N. 09/653,994  
Page 4

Dkt. No. 2271/62975

table and storing said collected communication control information in a receipt-rejected communication control information storage medium;

a communication control list creating medium creating a communication control list such that lists image information based on the communication control information respectively stored in said normal communication control information storage medium and said receipt-rejected communication control information storage medium, wherein the communication control information in connection with the communication relating to the message arrival from the communication partner not registered in said receipt-allowed communication partner registering table can be discriminated from the communication control information in connection with the communication relating to the receipt of the messages from the communication partner registered in a transmission-allowed communication registering table; and

a list outputting medium visibly outputting the list of image information created by said communication control list creating medium,

wherein when said communication relating to the message arrival from said communication partner not registered in said receipt-allowed communication partner registration table is rejected, a message receiving process is not performed by said communication terminal device for the receipt-rejected communication, and

wherein for a receipt-rejected communication partner, said list of image information shows a plurality of rejected communications from the receipt-rejected communication partner including for each rejected communication from the receipt-rejected communication partner the date and time of the rejected communication.

4. (previously presented) A method of controlling a communication terminal device provided with a function of rejecting receipt of messages from communication partners other than communication partners previously registered in a receipt-allowed communication partner registration table, said method comprising:

collecting communication control information in connection with communication relating to receipt of a message from a communication partner registered in a transmission-allowed communication partner registration table or said receipt-allowed communication partner registration table, and storing said collected communication control information in a normal communication control information storage medium;

Koichiro MAEMURA, S.N. 09/653,994  
Page 5

Dkt. No. 2271/62975

collecting communication control information in connection with a communication relating to message arrival from a communication partner not registered in said receipt-allowed communication partner registration table;

storing said corrected communication control information in a receipt-rejected communication control information storage medium;

creating a communication control list that lists image information based on the communication control information respectively stored in said normal communication control information storage medium and said receipt-rejected communication control information storage medium, wherein the communication control information in connection with the communication relating to the message arrival from the communication partner not registered in said receipt-allowed communication partner registering table can be discriminated from the communication control information in connection with the communication relating to the receipt of the messages from the communication partner registered in the transmission-allowed communication registering table; and

visibly outputting the communication control list of image information,

wherein when said communication relating to the message arrival from said communication partner not registered in said receipt-allowed communication partner registration table is rejected, a message receiving process is not performed by said communication terminal device for the receipt-rejected communication, and

wherein for a receipt-rejected communication partner, said list of image information shows a plurality of rejected communications from the receipt-rejected communication partner including for each rejected communication from the receipt-rejected communication partner the date and time of the rejected communication.

5. (original) The communication terminal device as defined in claim 1, wherein said communication control information collected by said receipt rejecting communication control medium and stored in said receipt-rejected communication control information storage medium in connection with the communication relating to the message arrival from the communication partner not registered in said receipt-allowed communication partner registering table includes communication partner discriminating information notified at the time of the message arrival.

Koichiro MAEMURA, S.N. 09/653,994  
Page 6

Dkt. No. 2271/62975

6. (original) The communication terminal device as defined in claim 3, wherein said communication control information collected by said receipt rejecting communication control medium and stored in said receipt-rejected communication control information memorizing medium in connection with the communication relating to the message arrival from the communication partner not registered in said receipt-allowed communication partner registering table includes communication partner discriminating information notified at the time of the message arrival.

7. (original) The method of controlling the communication terminal device as defined in claim 2, wherein said communication control information stored in said signal-receiving rejecting communication control information storage medium in connection with the communication relating to the message arrival from the communication partner not registered in said receipt-allowed communication partner registering table includes the communication partner discriminating information notified at the time of the message arrival.

8. (original) The method of controlling the communication terminal device as defined in claim 4, wherein said communication control information stored in said receipt-rejected communication control information storage medium in connection with the communication relating to the message arrival from the communication partner not registered in said receipt-allowed communication partner registering table includes communication partner discriminating information notified at the time of the message arrival.

9. (original) The communication terminal device as defined in claim 1, further comprising:

a time counting medium for counting a present date and time,

wherein the communication control information collected by said receipt-rejected communication control medium and stored in said receipt-rejected communication control information storage medium in connection with the communication relating to the message arrival from the communication partner not registered in said receipt-allowed communication partner registering table includes the date-and-time information read out from said time counting medium at the time of the message arrival.

Koichiro MAEMURA, S.N. 09/653,994  
Page 7

Dkt. No. 2271/62975

10. (original) The communication terminal device as defined in claim 3, further comprising:

a time counting medium for counting a present date and time,

wherein the communication control information collected by said receipt-rejected communication control medium and stored in said receipt-rejected communication control information storage medium in connection with the communication relating to the message arrival from the communication partner not registered in said receipt-allowed communication partner registering table includes the date-and-time information read out from said time counting medium at the time of the message arrival.

11. (original) The communication terminal device as defined in claim 5, further comprising:

a time counting medium for counting a present date and time

wherein the communication control information collected by said receipt-rejected communication control medium and stored in said receipt-rejected communication control information storage medium in connection with the communication relating to the message arrival from the communication partner not registered in said receipt-allowed communication partner registering table includes the date-and-time information read out from said time counting medium at the time of the message arrival.

12. (original) The communication terminal device as defined in claim 6, further comprising:

a time counting medium for counting the present date and time

wherein the communication control information collected by said receipt-rejected communication control medium and stored in said receipt-rejected communication control information storage medium in connection with the communication relating to the message arrival from the communication partner not registered in said receipt-allowed communication partner registering table includes the date-and-time information read out from said time counting medium at the time of the message arrival.

Koichiro MAEMURA, S.N. 09/653,994  
Page 8

Dkt. No. 2271/62975

13. (original) The communication terminal device as defined in claim 2, wherein the communication control information stored in said receipt-rejected communication control information storage medium in connection with the communication relating to the message arrival from the communication partner not registered in said receipt-allowed communication partner registering table includes date-and-time information at the time of the message arrival.

14. (original) The communication terminal device as defined in claim 4, wherein the communication control information collected by said receipt-rejected communication control medium and stored in said receipt-rejected communication control information storage medium in connection with the communication relating to the message arrival from the communication partner not registered in said receipt-allowed communication partner registering table includes date-and-time information at the time of the message arrival.

15. (original) The communication terminal device as defined in claim 7, wherein the communication control information collected by said receipt-rejected communication control medium and stored in said receipt-rejected communication control information storage medium in connection with the communication relating to the message arrival from the communication partner not registered in said receipt-allowed communication partner registering table includes date-and-time information at the time of the message arrival.

16. (original) The communication terminal device as defined in claim 8, wherein the communication control information collected by said receipt-rejected communication control medium and stored in said receipt-rejected communication control information storage medium in connection with the communication relating to the message arrival from the communication partner not registered in said receipt-allowed communication partner registering table includes date-and-time information at the time of the message arrival.

17. (previously presented) A facsimile device provided with a receipt-rejected function of rejecting message receipt from a communication partner other than communication partners previously registered in a receipt-allowed communication partner registering table, said facsimile device comprising:

Koichiro MAEMURA, S.N. 09/653,994  
Page 9

Dkt. No. 2271/62975

a receipt-rejected communication control medium collecting communication control information in connection with a communication relating to the message arrival from the communication partner not registered in said receipt-allowed communication partner registering table, and storing said collected communication control information in a receipt-rejected communication control information storage medium;

a communication control list creating medium creating a list of image information on the basis of the communication control information stored in said receipt-rejected communication control information storage medium; and

a list outputting medium visibly outputting said list of image information created by said communication control list creating medium,

wherein when said communication relating to the message arrival from said communication partner not registered in said receipt-allowed communication partner registering table is rejected, a facsimile receiving process is not performed by said facsimile device for the receipt-rejected communication, and

wherein for a receipt-rejected communication partner, said list of image information shows a plurality of rejected communications from the receipt-rejected communication partner including for each rejected communication from the receipt-rejected communication partner the date and time of the rejected communication.

18. (previously presented) A method of controlling a facsimile device provided with a receipt-rejected function of rejecting message receipt from a communication partner other than a communication partner previously registered in a receipt-allowed communication partner registering table, said method comprising the steps of:

collecting communication control information in connection with a communication relating to the message arrival from the communication partner not registered in said receipt-allowed communication partner registering table;

storing said collected communication control information in a receipt-rejected communication control information storage medium;

creating a list of image information on the basis of the communication control information stored in said receipt-rejected communication control information storage medium;  
and

Koichiro MAEMURA, S.N. 09/653,994  
Page 10

Dkt. No. 2271/62975

visibly outputting said created list of image information,  
wherein when said communication relating to the message arrival from said communication partner not registered in said receipt-allowed communication partner registering table is rejected, a facsimile receiving process is not performed by said facsimile device for the receipt-rejected communication, and

wherein for a receipt-rejected communication partner, said list of image information shows a plurality of rejected communications from the receipt-rejected communication partner including for each rejected communication from the receipt-rejected communication partner the date and time of the rejected communication.

19. (previously presented) A facsimile device provided with a receipt-rejected function of rejecting message receipt from a communication partner other than communication partners previously registered in a receipt-allowed communication partner registering table, said facsimile device comprising:

a normal communication control medium collecting communication control information in connection with a communication relating to a message receipt from a registered communication partner registered in a transmission-allowed communication partner registering table or in said receipt-allowed communication partner registering table and storing said collected communication control information in said normal communication control information storage medium;

a receipt-rejected communication control medium collecting communication control information in connection with a communication relating to message arrival from the communication partner not registered in said receipt-allowed communication partner registering table, and storing said collected communication control information in a receipt-rejected communication control information storage medium;

a communication control list creating medium creating a list of image information on the basis of the communication control information respectively stored in said normal communication control information storage medium and said receipt-rejected communication control information storage medium and creating communication control information in connection with the communication relating, to the message arrival from the communication partner not registered in said receipt-allowed communication partner registering table, such that

Koichiro MAEMURA, S.N. 09/653,994  
Page 11

Dkt. No. 2271/62975

both of said communication control information can be discriminated from the communication control information in connection with the communication relating to the message receipt from the communication partner registered in the transmission communication partner registering table or in said receipt-allowed communication partner registering table; and

a list outputting medium visibly outputting said list of image information created by said communication control list creating medium,

wherein when said communication relating to the message arrival from said communication partner not registered in said receipt-allowed communication partner registering table is rejected, a facsimile receiving process is not performed by said facsimile device for the receipt-rejected communication, and

wherein for a receipt-rejected communication partner, said list of image information shows a plurality of rejected communications from the receipt-rejected communication partner including for each rejected communication from the receipt-rejected communication partner the date and time of the rejected communication.

20. (previously presented) A method of controlling a facsimile device provided with a receipt-rejected function of rejecting message receipt from a communication partner other than communication partners previously registered in a receipt-allowed communication partner registering table, said method comprising the steps of:

collecting communication control information in connection with communication relating to message receipt from a communication partner registered in a transmission-allowed communication partner registering table or in said receipt-allowed communication partner registering table;

storing said collected communication control information in said normal communication control information storage medium;

collecting communication control information in connection with communication relating to the message arrival from the communication partner not registered in said receipt-allowed communication partner registering table;

storing said collected communication control information in said receipt-rejected communication control information storing medium;

Koichiro MAEMURA, S.N. 09/653,994  
Page 12

Dkt. No. 2271/62975

creating the list of image information on the basis of the communication control information respectively stored in said normal communication control information storing medium and said receipt-rejected communication control information storing medium and creating the communication control information in connection with communication relating to the message arrival from the communication partner not registered in said receipt-allowed communication partner registering table, such that both of said communication control information can be discriminated from the communication control information in connection with the communication relating to the message receipt from the communication partner registered in the transmission communication partner registering table or in said receipt-allowed communication partner registering table; and

visibly outputting said list of image information created by said communication control list creating medium,

wherein when said communication relating to the message arrival from said communication partner not registered in said receipt-allowed communication partner registering table is rejected, a facsimile receiving process is not performed by said facsimile device for the receipt-rejected communication, and

wherein for a receipt-rejected communication partner, said list of image information shows a plurality of rejected communications from the receipt-rejected communication partner including for each rejected communication from the receipt-rejected communication partner the date and time of the rejected communication.

21. (original) The facsimile device provided with a receipt-rejecting function as defined in claim 17, wherein the communication control information collected by said receipt-rejected communication control medium and stored in said receipt-rejected communication control information storing medium in connection with the communication relating to the message arrival from the communication partner not registered in said receipt-allowed communication partner registering table includes a communication partner identifying information.

22. (original) The facsimile device provided with a receipt-rejecting function as defined in claim 19, wherein the communication control information collected by said receipt-rejected communication control medium and stored in said receipt-rejected communication control

Koichiro MAEMURA, S.N. 09/653,994  
Page 13

Dkt. No. 2271/62975

information storing medium in connection with the communication relating to the message arrival from the communication partner not registered in said receipt-allowed communication partner registering table includes a communication partner identifying information.

23. (original) The method of controlling the facsimile device provided with a receipt-rejecting function as defined in claim 18, wherein the communication control information collected by said receipt-rejected communication control medium and stored in said receipt-rejected communication control information storing medium in connection with the communication relating to the message arrival from the communication partner not registered in said receipt-allowed communication partner registering table includes a communication partner identifying information.

24. (original) The method of controlling the facsimile device provided with a receipt-rejecting function as defined in claim 20, wherein the communication control information collected by said receipt-rejected communication control medium and stored in said receipt-rejected communication control information storing medium in connection with the communication relating to the message arrival from the communication partner not registered in said receipt-allowed communication partner registering table includes a communication partner identifying information.

25. (original) The method of controlling the facsimile device provided with a receipt-rejecting function as defined in claim 18, wherein the communication control information memorized in said receipt-rejected communication control information storing medium in connection with the communication relating to the message arrival from the communication partner not registered in said receipt-allowed communication partner registering table includes a communication partner identifying information.

26. (original) The method of controlling the facsimile device provided with a receipt-rejecting function as defined in claim 20, wherein the communication control information stored in said receipt-rejected communication control information storing medium in connection with the communication relating to the message arrival from the communication partner not registered

Koichiro MAEMURA, S.N. 09/653,994  
Page 14

Dkt. No. 2271/62975

in said receipt-allowed communication partner registering table includes a communication partner identifying information.

27. (original) The facsimile device provided with a receipt-rejecting functions as defined in claim 17,

wherein said facsimile device further comprises a time counting medium for counting the present date and time; and

wherein the communication control information collected by said receipt-rejected communication control medium and storing in said receipt-rejected communication control information memorizing medium in connection with the communication relating to the message arrival from the communication partner not registered in said receipt-allowed communication partner registering table includes the date-and-time information read out from said time counting medium at the time of the message arrival.

28. (original) The facsimile device provided with a receipt-rejecting functions as defined in claim 19,

wherein said facsimile device further comprises a time counting medium for counting the present date and time; and

wherein the communication control information collected by said receipt-rejected communication control medium and storing in said receipt-rejected communication control information storing medium in connection with the communication relating to the message arrival from the communication partner not registered in said receipt-allowed communication partner registering table includes the date-and-time information read out from said time counting medium at the time of the message arrival.

29. (original) The facsimile device provided with a receipt-rejecting, functions as defined in claim 21,

wherein said facsimile device further comprises a time counting medium for counting the present date and time; and

wherein the communication control information collected by said receipt-rejected communication control medium and stored in said receipt-rejected communication control

Koichiro MAEMURA, S.N. 09/653,994  
Page 15

Dkt. No. 2271/62975

information storing medium in connection with the communication relating to the message arrival from the communication partner not registered in said receipt-allowed communication partner registering table includes the date-and-time information read out from said time counting medium at the time of the message arrival.

30. (original) The facsimile device provided with a receipt-rejecting functions as defined in claim 22,

wherein said facsimile device further comprises a time counting medium for counting the present date and time; and

wherein the communication control information collected by said receipt-rejected communication control medium and stored in said receipt-rejected communication control information storing medium in connection with the communication relating to the message arrival from the communication partner not registered in said receipt-allowed communication partner registering table includes the date-and-time information read out from said time counting medium at the time of the message arrival.

31. (original) The method of controlling the facsimile device provided with a receipt-rejecting function as defined in claim 18 further comprising the steps of:

counting the present date and time by use of a time counting medium;

collecting said communication control information by use of said receipt-rejected communication control medium; and

storing said collected communication control information in said receipt-rejected communication control information storing medium in connection with the communication relating to the message arrival from the communication partner not registered in said receipt-allowed communication partner registering table so as to include the date-and-time information read out from said time counting medium at the time of the message arrival.

32. (original) The method of controlling the facsimile device provided with a receipt-rejecting function as defined in claim 20 further comprising the steps of:

counting the present date and time by use of a time counting medium;

Koichiro MAEMURA, S.N. 09/653,994  
Page 16

Dkt. No. 2271/62975

collecting said communication control information by use of said receipt-rejected communication control medium; and

storing said collected communication control information in said receipt-rejected communication control information storing medium in connection with the communication relating to the message arrival from the communication partner not registered in said receipt-allowed communication partner registering table so as to include the date-and-time information read out from said time counting medium at the time of the message arrival.

33. (original) The method of controlling the facsimile device provided with a receipt-rejecting function as defined in claim 23 further comprising the steps of:

counting the present date and time by use of a time counting medium;

collecting said communication control information by use of said receipt-rejected communication control medium; and

storing said collected communication control information in said receipt-rejected communication control information storing medium in connection with the communication relating to the message arrival from the communication partner not registered in said receipt-allowed communication partner registering table so as to include the date-and-time information read out from said time counting medium at the time of the message arrival.

34. (original) The method of controlling the facsimile device provided with a receipt-rejecting function as defined in claim 24 further comprising the steps of:

counting the present date and time by use of a time counting medium;

collecting said communication control information by use of said receipt-rejected communication control medium; and

storing said collected communication control information in said receipt-rejected communication control information storing medium in connection with the communication relating to the message arrival from the communication partner not registered in said receipt-allowed communication partner registering table so as to include the date-and-time information read out from said time counting medium at the time of the message arrival.

Koichiro MAEMURA, S.N. 09/653,994  
Page 17

Dkt. No. 2271/62975

35. (previously presented) The method of controlling the facsimile device provided with a receipt-rejecting function as defined in claim 18 further comprising the step of:

storing said collected communication control information in said receipt-rejected communication control information storing medium in connection with the communication relating to the message arrival from the communication partner not registered in said receipt-allowed communication partner registering table so as to include the date-and-time information read out at the time of the message arrival.

36. (previously presented) The method of controlling the facsimile device provided with a receipt-rejecting function as defined in claim 20 further comprising the step of:

storing said collected communication control information in said receipt-rejected communication control information storing medium in connection with the communication relating to the message arrival from the communication partner not registered in said receipt-allowed communication partner registering table, so as to include the date-and-time information read out at the time of the message arrival.

37. (previously presented) The method of controlling the facsimile device provided with a receipt-rejecting function as defined in claim 23 further comprising the step of:

storing said collected communication control information in said receipt-rejected communication control information storing medium in connection with the communication relating to the message arrival from the communication partner not registered in said receipt-allowed communication partner registering table so as to include the date-and-time information read out at the time of the message arrival.

38. (previously presented) The method of controlling the facsimile device provided with a receipt-rejecting function as defined in claim 24 further comprising the step of:

storing said collected communication control information in said receipt-rejected communication control information storing medium in connection with the communication relating to the message arrival from the communication partner not registered in said receipt-allowed communication partner registering table so as to include the date-and-time information read out at the time of the message arrival.

Koichiro MAEMURA, S.N. 09/653,994  
Page 18

Dkt. No. 2271/62975

39. (previously presented) A communication terminal device provided with a function of rejecting the receipt of messages from communication partners excluding a communication partner previously registered in a receipt-allowed communication partner registration table, said communication terminal device comprising:

receipt rejecting communication control means collecting communication control information in connection with a communication relating to message arrival from a communication partner not registered in said receipt-allowed communication partner registration table, and storing said collected communication control information in signal-receiving rejecting communication control information storing means;

communication control list creating means creating a list of image information on the basis of said communication control information stored in said signal-receiving rejecting communication control information storing means; and

list outputting means visibly outputting said list of image information created by said communication control list creating means,

wherein when said communication relating to the message arrival from said communication partner not registered in said receipt-allowed communication partner registration table is rejected, a message receiving process is not performed by said communication terminal device for the receipt-rejected communication, and

wherein for a receipt-rejected communication partner, said list of image information shows a plurality of rejected communications from the receipt-rejected communication partner including for each rejected communication from the receipt-rejected communication partner the date and time of the rejected communication.

40. (previously presented) A communication terminal device provided with a function of rejecting the receipt of messages from communication partners excluding a communication partner previously registered in a receipt-allowed communication partner registration table, said communication terminal device comprising:

normal communication control means collecting communication control information in connection with a communication relating to receipt of message from a communication partner registered in a transmission-allowed communication partner registration table or said receipt-

Dkt. No. 2271/62975

Koichiro MAEMURA, S.N. 09/653,994  
Page 19

allowed communication partner registration table, and storing said collected communication control information in said normal communication control information storing means;

receipt-rejected communication control means collecting said communication control information in connection with the communication relating to the message arrival from a communication partner not registered in said receipt-allowed communication partner registration table and storing said corrected communication control information in a receipt-rejected communication control information memorizing means;

communication control list creating means creating said communication control list such that a list of image information based on the communication control information respectively stored in said normal communication control information storing means and said receipt-rejected communication control information storing means, and the communication control information in connection with the communication relating to the message arrival from the communication partner not registered in said receipt-allowed communication partner registering table can be discriminated from the communication control information in connection with the communication relating to the receipt of the messages from the communication partner registered in a transmission-allowed communication registering table; and

list outputting means visibly outputting the list of image information created by said communication control list creating means,

wherein when said communication relating to the message arrival from said communication partner not registered in said receipt-allowed communication partner registration table is rejected, a message receiving process is not performed by said communication terminal device for the receipt-rejected communication, and

wherein for a receipt-rejected communication partner, said list of image information shows a plurality of rejected communications from the receipt-rejected communication partner including for each rejected communication from the receipt-rejected communication partner the date and time of the rejected communication.

41. (previously presented) A facsimile device provided with a receipt-rejected function of rejecting the message receipt from a communication partner excluding communication partners previously registered in a receipt-allowed communication partner registered in a receipt-allowed communication partner registering table, said facsimile device comprising:

Koichiro MAEMURA, S.N. 09/653,994  
Page 20

Dkt. No. 2271/62975

receipt-rejected communication control means collecting communication control information in connection with a communication relating to message arrival from the communication partner not registered in said receipt-allowed communication partner registering table, and storing said collected communication control information in said receipt-rejected communication control information storing means;

communication control list creating means creating a list of image information on the basis of the communication control information stored in said receipt-rejected communication control information storing means; and

list outputting means visibly outputting said list of image information created by said communication control list creating means,

wherein when said communication relating to the message arrival from said communication partner not registered in said receipt-allowed communication partner registering table is rejected, a message receiving process is not performed by said facsimile device for the receipt-rejected communication, and

wherein for a receipt-rejected communication partner, said list of image information shows a plurality of rejected communications from the receipt-rejected communication partner including for each rejected communication from the receipt-rejected communication partner the date and time of the rejected communication.

42. (previously presented) A facsimile device provided with a receipt-rejected function of rejecting the message receipt from a communication partner excluding communication partners previously registered in a receipt-allowed communication partner registering table, said facsimile device comprising:

normal communication control means collecting communication control information in connection with a communication relating to message receipt from a communication partner registered in a transmission-allowed communication partner registering table or in said receipt-allowed communication partner registering table and storing said collected communication control information in said normal communication control information storing means;

receipt-rejected communication control means collecting communication control information in connection with a communication relating to message arrival from the communication partner not registered in said receipt-allowed communication partner registering

Dkt. No. 2271/62975

Koichiro MAEMURA, S.N. 09/653,994

Page 21

table, and storing said collected communication control information in said receipt-rejected communication control information storing means;

communication control list creating means creating the list of image information on the basis of the communication control information respectively memorized in said normal communication control information storing means and said receipt-rejected communication control information storing means and creating the communication control information in connection with the communication relating to the message arrival from the communication partner not registered in said receipt-allowed communication partner registering table, such that both of said communication control information can be discriminated from the communication control information in connection with the communication relating to the message receipt from the communication partner registered in the transmission communication partner registering table or in said receipt-allowed communication partner registering table; and

list outputting means visibly outputting said list of image information created by said communication control list creating means,

wherein when said communication relating to the message arrival from said communication partner not registered in said receipt-allowed communication partner registering table is rejected, a message receiving process is not performed by said facsimile device for the receipt-rejected communication, and

wherein for a receipt-rejected communication partner, said list of image information shows a plurality of rejected communications from the receipt-rejected communication partner including for each rejected communication from the receipt-rejected communication partner the date and time of the rejected communication.

Claims 43-44 (canceled).

Claim 45 (new) The communication terminal device as defined in claim 1, wherein said list of image information only shows a plurality of rejected communications from receipt-rejected communication partners including for each rejected communication from a receipt-rejected communication partner the date and time of the rejected communication.
